- (54) Title: METHOD, MEANS, AND COMPUTER PROGRAM PRODUCT FOR CONTROLLING AND/OR RESTRICTING USE OF TELECOMMUNICATIONS CONNECTION

WO 2004/008687 A1

- (57) **Abstract:** This publication discloses a method for monitoring and/or limiting the use of a data communications connection subject to payment between IP clients in a packet-switched connection network (15), in which method the operator terminal (13), such as a SIP system, of the signalling channel of the connection station of the client is set to control a traffic limiter (16), such as a firewall in the operator's traffic-relaying system between the source terminal (11) and the destination terminal (12). The publication also discloses means for limiting the use of a data communications connection subject to payment, between IP clients, in a packet-switched connection network (15) and a computer software product for limiting the use of a data communications connection subject to payment, between IP clients, in a packet-switched connection network (15).

(57) Abstract:

This publication discloses a method for monitoring and/or limiting the use of a data communications connection subject to payment between IP clients in a packet-switched connection network (15), in which method the operator terminal (13), such as a SIP system, of the signalling channel of the connection station of the client is set to control a traffic limiter (16), such as a firewall in the operator's traffic-relaying system between the source terminal (11) and the destination terminal (12). The publication also discloses means for limiting the use of a data communications connection subject to payment, between IP clients, in a packet-switched connection network (15) and a computer software product for limiting the use of a data communications connection subject to payment, between IP clients, in a packet-switched connection network (15).
